Portfolio

Profile

I'm a B.Tech graduate in Information Technology building responsive web interfaces and practical application flows across frontend, backend, and data. I work with JavaScript, React, TypeScript, Node.js, PostgreSQL, and Supabase. I'm looking for frontend, full-stack, or backend developer roles in Kolkata or remotely.

Technical Skills

Languages	JavaScript, TypeScript, Java, SQL, HTML, CSS
Frontend	React, Vite, Tailwind CSS, Material UI, Bootstrap
Backend and data	Node.js, Express.js, REST APIs, PostgreSQL, Supabase, authentication, row-level security, SQL RPCs
Tools and concepts	Git, GitHub, VS Code, Google Generative AI, component-based development, object-oriented programming, data structures

Projects

Productivity Garden — ACTIVE DEVELOPMENT

JavaScript, Vite, Supabase, PostgreSQL

I'm building a task-to-plant MVP with Supabase Auth, row-level security, database integrity constraints, and a transactional plant_seed() RPC. Tasks grow through a 20-minute, five-stage cycle before harvest; edge-case hardening and deployment are in progress.

Neural-Decider — LIVE EXPERIMENT

React, TypeScript, Google Generative AI, Recharts

I built a choice-based reflection experiment that uses AI-generated responses to user scenarios. I present it as an exploration, not a validated psychological assessment.

Iron-Forge — PROTOTYPE

Node.js, Express, PostgreSQL

I started a workout tracker for recording exercises, weights, and reps, with PostgreSQL persistence. Frontend/backend integration and deployment remain in progress.

KeeperApp — LIVE DEMO

React, Material UI

I built a responsive notes app with note creation and deletion. Notes remain in page state and do not persist after refresh.

Experience

Contract Legal Transcriptor - Percept Legal — Kolkata | 19 Jan 2026 - 29 May 2026

I transcribed court recordings with accurate speaker labels, met daily client deadlines, and checked transcripts for discrepancies.

Education and Certifications

B.Tech, Information Technology - Guru Nanak Institute of Technology, Kolkata - June 2025 - CGPA 7.91
Full-Stack Web Developer (Udemy) | SQL, Data Structures, Introduction to Java and Object-Oriented Programming (Coursera)

Interests

Gym | Martial arts | Guitar | Design
